SG1A

1. (S/NF/SK) MISSION: Identify the purpose and function of the target site [REDACTED]

2. (S/NF/SK) VIEWER TASKING: 011 was provided with the identical tasking data sheet furnished this project manager (see attached).

3. (S/NF/SK) COMMENTS: 011 feels that the session was "either all right, or all wrong". The transcript/summary speaks for itself. [Note: This is the "best SOLO session I have ever seen" with regard to CRV structure, data flow and extent of information. If it is indeed "all right", then it represents a milestone--much to the credit of 011. It should be noted, also, that this viewer is particularly adept at picking up on "Stage 4 overlay" (i.e., things like peculiarities associated with the tasking itself) and did in fact detect "something unusual" in this regard, especially in the sense of the target "feeling like a friendly site"].

4. (S/NF/SK) EVALUATION: [2] *[Handwritten notes: Results accurate; viewer is the best; determining factors; etc.]*
